1897

STATE BOILER INSPECTOR'S OFFICE,

Helena, Montana, November 30th, 1896.

To His Excellency, the Honorable,

JOHN E. RICKARDS,

Governor of Montana.

Sir:—I have the honor to submit herewith, the Eighth Annual Report of this department.

A comparison of the attached condensed recapitulation of the work done by this department since 1891, previous to which time there are no available reports, and the following tabulated and detailed report, will show the increase in the work accomplished by the inspectors in the number of boilers inspected, and a corresponding increase in the receipts of the office which, during the year just closed, came within the sum of \$293.60 of meeting the total expenses of maintaining the office, including salaries, traveling and office expenses.

The law relative to the inspection of boilers, requires that all boilers which come under the law, shall be inspected at least once in each year. While an increase each year, in the number of boilers inspected, has been made; still, in no year has it been possible to inspect all of the boilers in operation, owing to the fact that two inspectors are unable to do the amount of work necessary to cover the state. The constant increase in the number of boilers in operation, and the extra amount of office work, necessitates an additional amount of help.

For the possible more effective attainment of the purposes of the present inspection law, I have the honor to recommend to your Excellency's attention, the following amendments, to-wit:

First. That an additional assistant inspector be appointed and that the appropriation for the boiler inspection department be increased so as to cover his salary and expenses.

Second. That all steam-boilers and engines mounted on wheels, and all classes of steam-boilers and engines of more than five horse-power, excepting locomotive-boilers and loco-

motive engines, and the persons operating the same, be brought under the inspection law of the state.

Third. As previously recommended in my report of 1894, to-wit: Provision should be made for the examination of, and the granting of a special license, to operators—not engineers—of low-pressure steam-heating plants in use in the state. This examination and special license to cover qualifications below the grade, even, of a third-class engineer; provide for the care of this special class of steam plants only, for which this class of applicants may be found qualified.

It is gratifying to state, that during my incumbency in office, there has been no explosion of any steam-boiler or connections thereto, of the class brought under the law.

By reference to the attached condensed recapitulation of the work done by this department since 1891, it will be noted that there were more than double the amount of boilers inspected during this year than there were the first year of my term, 1893, which is due to the fact that the inspectors have become more thoroughly acquainted with the locations of the steam plants, and the most advantageous times for making the inspections thereof. It should be further noted, that the office has been almost self-sustaining during the past year, and I believe that it could be made fully self-sustaining by the appointment of an additional assistant inspector, as recommended above.

In the discharge of their duties, the inspectors have met with the most uniform courtesy upon the part of the state officials. The hearty co-operation and courteous treatment and assistance tendered by the engineers in charge, and by the owners and managers of the steam plants throughout the state, has greatly facilitated the work, and is here respectfully acknowledged.

Very respectfully,

Your obedient servant,

GEORGE BLINN,

State Boiler Inspector.

RECAPITULATION OF WORK PERFORMED BY THE BOILER
INSPECTOR DEPARTMENT.

From November 30, 1890, to November 30, 1896.

Year.	Boilers Inspected.	Total Receipts.	Total Expenses.	Deficiency.
1891	393	\$4,515 00	\$6,997 44	\$2,482 44
1892	338	4,450 0	6,498 25	2,048 25
1893	301	4,665 50	6,571 21	1,905 21

Bal. in Appropriation for Traveling and Office expenses		40
Total.....		\$14,106 00

BOILER INSPECTIONS.

Total number of miles traveled.....	18,486
Number of visits made.....	736
Number of boilers examined.....	765
Number examined externally and internally.....	601
Number tested by hydrostatic pressure.....	606

In these visits and inspections, 5,418 defects were noted, of which 449 were considered dangerous and suitable necessary repairs were ordered to be made

Twelve boilers were condemned as unfit for further use. Reference is made to the following classified list of defects:

Nature of defect.	No. Noted	No. Dangerous.
Cases of deposit of sediment.....	474	17
Cases of incrustation and scale	516	25
Cases of internal grooving and pitting.....	161	13
Cases of internal corrosion	141	9
Cases of external corrosion.....	139	4
Broken, loose or defective stays.....	132	26
Defective settings.....	71	12
Furnaces out of shape.....	128	19
Fractured plates.....	56	10
Burned plates.....	93	7
Bagged or blistered plates.....	90	6
Defective Rivets.....	1,233	6
Defective Heads.....	63	8
Leakage around tube ends.....	1,207	132
Leakage at seams.....	362	19
Defective water-gauges.....	109	25
Defective blow-outs.....	67	20
Cases of deficiency of water.....	5	2
Safety-valves overloaded.....	36	29
Defective safety-valves.....	97	32
Boilers without safety-valves	2	2
Defective pressure gauges.....	223	23
Boilers without pressure guages.....	13	3
Total.....	5,418	449
